

NeuroSense360

What This Software Does A Simple Guide

Limitless Brain Lab | March 2026
www.neurosense360.site

What is NeuroSense360?

NeuroSense360 is an **online platform for brain health**. It helps doctors and clinics check how a person's brain is performing using EEG scans, and gives easy-to-understand reports with suggestions to improve brain health.

Think of it like this: A patient gets a brain scan at a clinic. The clinic uploads the scan to NeuroSense360. The software uses AI to read the scan, create a detailed report, and suggest ways to improve brain health. The patient can then log in and see their report online.

Who Uses This Software?

There are **4 types of users**:

User	Who are they?	What do they do?
------	---------------	------------------

Website Visitor	Anyone visiting the website	Learn about brain health, view pricing, register
Super Admin	The NeuroSense360 team (you)	Manage the entire platform, all clinics, all data
Clinic Admin	Doctors / clinic staff	Manage their patients, upload brain scans, view reports
Patient	People getting brain assessments	View their brain reports, track progress, book appointments

What a Website Visitor Can Do

WEBSITE VISITOR

When someone opens **www.neurosense360.site**, they see a professional website with:

- **Home Page** - What NeuroSense360 is, how it works, success stories
- **About Us** - The team and company information
- **Science Page** - How brain scanning works (the research behind it)
- **Brainwave Guide** - Simple explanation of brain waves (Delta, Theta, Alpha, Beta, Gamma)
- **Pricing Page** - Different plans and their costs
- **Locations** - Find a clinic near you (with map)
- **Contact Form** - Send a message to the team
- **Book an Appointment** - Schedule a brain assessment
- **Register** - Create an account (as a patient or as a clinic)
- **Login** - Sign in to their dashboard

Goal: The website convinces visitors to either sign up as a patient or register their clinic.

What the Super Admin Can Do

SUPER ADMIN

The Super Admin is the **owner/operator of the platform**. They can see and control everything.

1. Dashboard - See the Big Picture

- How many clinics are registered
- How many patients are on the platform

- How many reports have been generated
- How much money has been earned this month

2. Manage Clinics

- See all registered clinics
- Approve or reject new clinic registrations
- Activate or deactivate a clinic
- Edit clinic details (name, contact, address)
- See which clinics are on trial and when their trial ends

3. View All Reports

- See every brain report generated across all clinics
- Filter by clinic name, patient name, or date
- Download any report as PDF
- Check report quality

4. Track Payments & Revenue

- See all payments received from clinics and patients
- View revenue breakdown (which clinic paid how much)
- Check payment status (paid, pending, failed)
- Export payment reports

5. Analytics - Understand the Business

- See growth trends (new users per month)
- Track which features are most popular
- Monitor how many clinics are active vs. inactive
- Advanced reports on retention and revenue

6. Manage Coaches

- Add brain health coaches to the platform
- Assign coaches to specific clinics

- Track coach schedules and certifications

7. Process Brain Scan Data

- Run the brain analysis algorithm on uploaded scans
- Process multiple scans at once (bulk processing)
- Check if the algorithm ran successfully

8. Manage Website Content

- Edit pages on the website (like a mini website builder)
- Add new pages or remove old ones
- Update FAQs, privacy policy, etc.

9. Set Up Alerts

- Get notified when a clinic's trial is about to end
- Get notified when a clinic is running out of reports
- Set up email alerts for important events

10. System Settings

- Configure email settings
- Set up payment gateway keys
- Manage API keys for AI services

What a Clinic Admin Can Do

CLINIC ADMIN

A Clinic Admin is a **doctor or clinic staff member** who manages their clinic's patients and reports.

1. Clinic Dashboard - Quick Overview

- See how many patients they have
- See how many reports they've used out of their allowed limit
- Check their subscription status (trial, active, expired)
- See recent activity

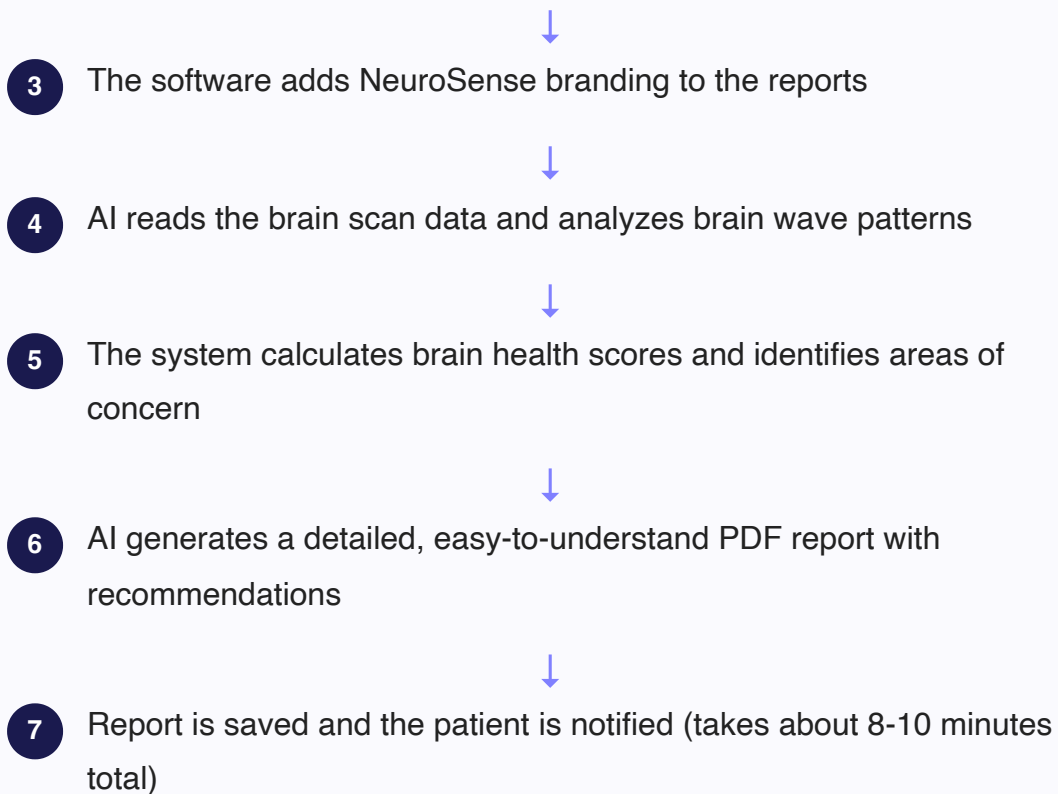

2. Manage Patients

- **Add a new patient** - Enter name, email, phone, date of birth, gender
- **Edit patient details** - Update contact info, medical history
- **Search patients** - Find a patient by name or ID
- **Import patients** - Upload a list of patients from a file
- **Set improvement focus** - What does this patient need help with? (anxiety, sleep, focus, ADHD, etc.)
- **View patient history** - See all past reports and progress

3. Upload Brain Scans & Get Reports

This is the **most important feature** for clinics. Here's what happens:

- 1 Clinic does an EEG brain scan on the patient
- ↓
- 2 Clinic uploads the scan files (Eyes Open + Eyes Closed PDFs) to NeuroSense360

4. View & Download Reports

- See all reports for their clinic's patients
- Download reports as PDF
- Filter reports by patient name or date
- Track progress across multiple reports for the same patient

5. Buy More Reports

- Each clinic gets a fixed number of reports based on their plan
- When reports are running low, they can buy more
- Reports are sold in packages (10, 25, 50, or 100)
- Payment via Razorpay (India) or Stripe (international)

6. Track Usage

- See how many reports have been used vs. how many are left
- Monthly usage trends
- Cost per report

7. Clinic Settings

- Update clinic name, address, phone number
- Upload clinic logo
- Manage team members

What a Patient Can Do

PATIENT

A patient is someone who has had a **brain scan done at a clinic** and wants to track their brain health.

1. Personal Dashboard

- See their brain health scores at a glance
- View their latest report
- See recommended next steps
- Track goals and targets

2. View Brain Reports

- Open their AI-generated brain health report
- Download report as PDF
- Understand their brain wave patterns in simple language
- See what areas need improvement

3. Brain Health Scores

The system gives patients these scores:

Score	What it measures
Brain Fitness Score	Overall brain health (0-100)
Brain Burnout Score	How stressed the brain is
Brain Performance Score	How well the brain is working (focus, memory, etc.)
Neuro Age	Is your brain older or younger than your actual age?

4. Track Progress Over Time

- Compare current scores with previous scores

- See trend charts (is brain health improving?)
- View milestones and achievements
- Weekly progress reports

5. Wellness Programs (based on subscription)

Patients can access different programs depending on their plan:

Program	What it is	Available in
ANS Reset Protocol	Exercises to calm the nervous system	Basic and above
MOVERS	Movement-based brain exercises	Basic and above
Five Pillars	Foundation wellness habits	Basic and above
Frequencies & Music	Therapeutic sounds for the brain	Pro and above
Meditations	Guided meditations	Pro and above
Supplements Guide	Brain health supplement suggestions	Pro and above
Brain Coach	One-on-one coaching sessions	Premium and above
Home Neurofeedback	Brain training you can do at home	Premium and above

6. Book Appointments

- Schedule a new brain scan or follow-up
- See available time slots
- Get reminders before appointments
- Cancel or reschedule

7. Manage Subscription

- See current plan (Free, Basic, Pro, Premium)
- Upgrade to a higher plan for more features

- [View billing history](#)

Pricing Plans

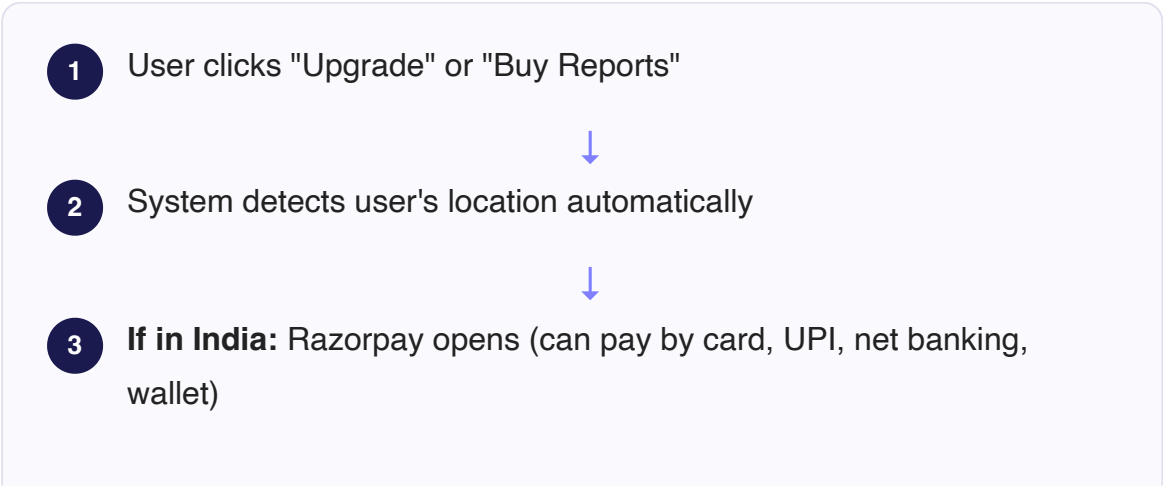

Plan	Price (INR)	Price (USD)	Reports	What's included
Free	Free	Free	0	Profile, brain info, daily inspiration
Basic	₹999	\$9.99	10	+ ANS Reset, MOVERS, Five Pillars
Pro	₹1,999	\$19.99	25	+ Frequencies, Meditations, Supplements
Premium	₹3,499	\$34.99	50	+ Brain Coach, Home Neurofeedback, Assessments
Enterprise	₹5,999	Custom	100+	Everything + custom support

Also available in EUR, GBP, AED, AUD, CAD, SGD.

For Clinics Specifically

- **Free Trial:** 30 days with 50 free reports
- **After trial:** Buy report packages (10, 25, 50, or 100 reports)
- **Alerts:** Email reminders when trial is ending or reports are running low

How Payments Work

If outside India: Stripe opens (can pay by card, Apple Pay, Google Pay)

4 Payment is processed instantly

5 Features unlock immediately + confirmation email sent

What's Inside the AI-Generated Report?

When a clinic uploads a brain scan, the AI generates a **detailed PDF report** with these sections:

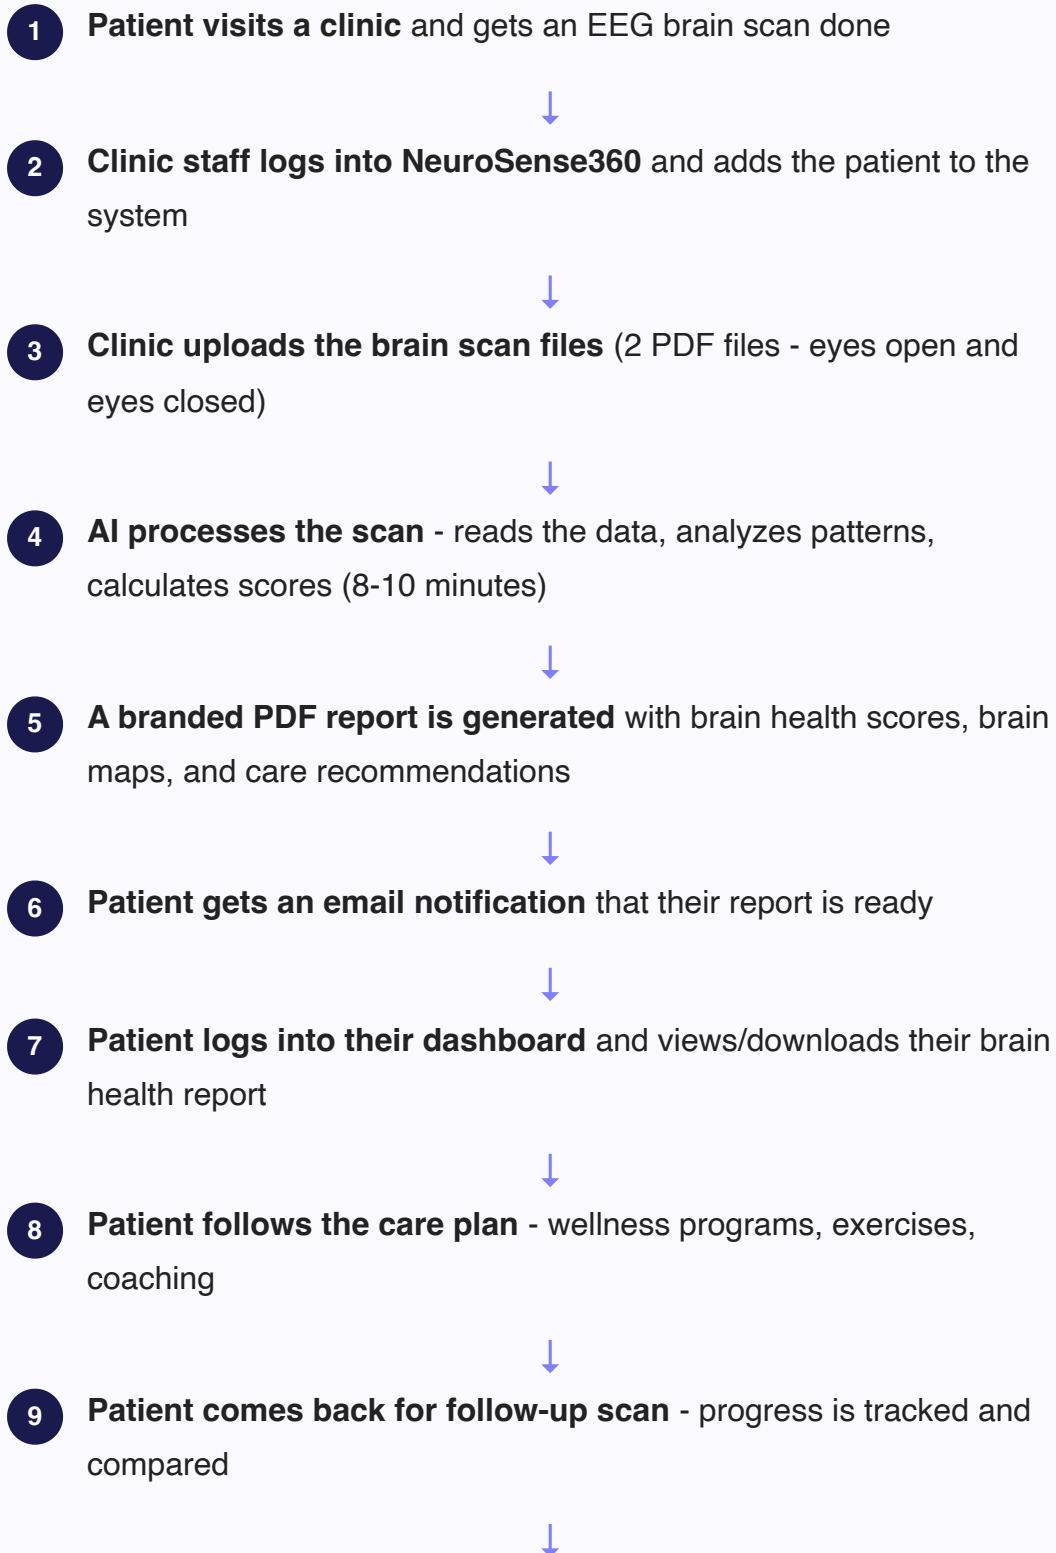

#	Section	What it shows
1	Cover Page	Patient name, date, clinic name, NeuroSense branding
2	Introduction	What this assessment is and how to read the report
3	Brain Type	What type of brain the patient has (e.g., "The Overthinker", "The Creative")
4	Brain Wave Profiles	Analysis of each brain wave (Delta, Theta, Alpha, Beta, Gamma) - what's normal, what's high/low
5	Brain Topology	Map of the brain showing which regions are active/inactive
6	Brain Map Comparison	How the patient's brain compares to normal/healthy brains
7	Cognition Page	Focus, memory, processing speed, attention analysis
8	Your Numbers	Detailed scores for each brain metric
9	Numbers at a Glance	Simple summary scorecard
10	Detailed Metrics	Graphs and charts showing brain performance
11	Congratulations	Summary of findings + suggested next steps
12	Appendix	Technical details and scientific references
13	Disclaimers	Legal and medical disclaimers

Email Notifications

The system automatically sends emails for:

- New account registration confirmation
- New report ready for viewing
- Trial ending soon (7 days, 3 days, 1 day warnings)
- Reports running low
- Payment confirmation and invoice
- Appointment reminders
- Password reset requests
- Contact form submissions (sent to sweta.adata@gmail.com)

How Everything Connects - The Big Picture

10

Super Admin monitors everything - clinics, revenue, reports, system health

How the Business Makes Money

Revenue Source	How it works
Clinic Report Packages	Clinics buy report credits in packs of 10, 25, 50, or 100. Each brain scan report uses 1 credit.
Patient Subscriptions	Patients pay monthly for access to wellness programs (Basic/Pro/Premium/Enterprise).
Free Trial Conversion	Clinics get 30 days free trial with 50 reports. After that, they need to purchase.

Security & Data Protection

- **Passwords are encrypted** - No one can see a user's password, not even the admin
- **Data is private** - Clinics can only see their own patients. Patients can only see their own reports.
- **Secure payments** - All payments go through Razorpay or Stripe (bank-level security)
- **HTTPS encryption** - All data transfer is encrypted
- **Access logs** - The system tracks who accessed what and when
- **Email verification** - Accounts must verify email before they can be used

Where the Software Runs

Component	Where it runs	What it does
-----------	---------------	--------------

Website (Frontend)	Vercel	Everything the user sees and clicks
Server (Backend)	Render	Processes brain scans, generates reports, handles payments
Database	Supabase	Stores all data - patients, clinics, reports, payments
File Storage	Supabase Storage	Stores uploaded brain scans and generated PDF reports
AI	Google Gemini	Reads brain scans and writes the report content
Domain	neurosense360.site	The website address users visit
